Skills

Languages

Python, Java/Spring Boot, PHP/Laravel, React, NextJS, SolidJS, React-Query, VueJS, NuxtJS, Express, MongoDB, MySQL, Postgress, GraphQL, WebSockets Tailwind, Typescript, SASS

Artificial Intelligence

TensorFlow, Pytorch, Scikit-learn, Langchain, LLMs, OpenCV, Huggingface

Other

Amazon Web Service, Google Cloud Platform, ViteJS, Turborpo, Playwright

Education

Armstrong Atlantic State University, Savannah, GA, 2006
Bachelor's degree of Computer Science, 2010

Certification

Scrum Master Certification (SMPC, CSM, PSM, SCM equivalency)

Soldier, US Army

1998-2001

Jesse Daniel Brown

Senior Software Engineer

Summary

Experienced software engineer with over 15 years of hands-on experience in developing robust and user-friendly applications.
Proven track record of successfully delivering high-quality projects and leading frontend and backend development teams.
Expertise in leveraging modern web technologies, frameworks, and libraries to create innovative and immersive user experiences in the blockchain industry.

Experience

Senior Software Engineer Work, *D&J IDIOMAS, 2017-2024*

- Develop chatbots using ChatGPT, Rasa and Langchain, creating conversational agents with natural language understanding and dialogue management capabilities.
- Advanced expertise in computer vision, leading projects to extract meaningful insights from visual data, contributing to the development of systems with applications in surveillance, autonomous vehicles, and augmented reality.
- Familiar with popular ML libraries and frameworks like TensorFlow, PyTorch, Keras, and scikit-learn, leveraging them for various machine learning projects.
- Built NFT marketing platform and Gaming app using NextJs, Tailwind CSS, Typescript, MUI and Graphql
- Used blockchain technologies such as web3js, Moralis, IPFS, wagmi and web3Modal
- Collaborated with smart contract engineer and designers closely
- Built the backend infractructure and cron jobs using
- nodejs, graphql, postgresql and prisma ensuring the transactions are processed correctly.
- Used Jest for unit testing and playwright for e2e testing
- Strong problem-solving skills and a deep passion for tackling complex technical challenges.
- Collaborate closely with cross-functional teams, understanding business objectives and translating them into solutions.

Full Stack Developer Work, *Design Concepts Inc 2009-2017*

- Developed the amazing free coupon web app and browser extension using VueJs
- Contributed to backend infrastructure using python, nodejs and postgresql
- Set up CI/CD pipeline on AWS, automating the build, testing and deployment processes

- Deployed applications on multiple cloud-based production environments and maintained staging environments for testing, leading to smoother releases
- Integrated a wide range of third-party services and components like payment gateways, geo-location services, and social media logins
- Created web-based CMSs to enable simplified content management, resulting in quicker updates to site information and features
- Worked on mono repo structure project for a largest-scale web application and reduced code duplication by 30% and made the development more efficient.
- Worked with designers to create a fully responsive UI/UX based on Material-UI, with custom theming, accessiblity and internationalization
- Converted the codebase from Javascript to Typescript which improved code standards, avoided type mismatch and warnings.
- Worked and created an e-commerce website using PHP, MySQL, and JavaScript.
- Develop front-end code using HTML, CSS, JavaScript, jQuery to create a responsive web application that works across 29 devices, including desktops and tablets
- Worked closely with designers to move a legacy web platform from jquery/AngularJS to React
- Used React to create a reusable UI components that made the website more use-friendly and consistent
