Senior Software Engineer - *AI and blockchain.*

We are a pioneering technology company that specialises in AI-powered Gaimified TV. Our cutting-edge platform seamlessly integrates gamification elements into television content and ads, creating an immersive and engaging experience for viewers.

You will work with our CTO to architect and build scalable AI and blockchain systems, mentor junior team members, and collaborate with stakeholders to deliver innovative AI-driven products and services.

Responsibilities:

- Ensure fast scalability of our system landscape covering development work, sysadmin tasks, e.g. adding endpoints for DB queries, expanding the backend architecture, bug fixing, maximising uptime.
- Support for architecting robust AI architectures and data pipelines to support the collection, pre-processing, and analysis of large and complex datasets.
- Collaborate closely with cross-functional teams to understand business requirements, prioritise tasks, and drive the adoption of AI and blockchain technologies across different domains.
- Stay abreast of the latest advancements in AI research and technologies and assess their potential impact on the organization's AI and blockchain strategy and roadmap.

What you'll need:

- Hands-on experience in developing and deploying Blockchain and AI solutions across the full stack.
- Proven expertise in programming languages such as Python, JavaScript and TypeScript.
- Deep understanding of machine learning concepts and techniques, including supervised and unsupervised learning, deep learning, and reinforcement learning.
- Extensive experience with building and deploying AI models in cloud environments (e.g., AWS, Azure, Google Cloud Platform).
- Familiarity with containerisation and orchestration tools such as Docker and Kubernetes, and experience with microservices architecture.
- Excellent problem-solving skills and ability to troubleshoot complex technical issues in AI and blockchain systems.
- Demonstrated track record of driving results, delivering high-quality solutions, and leading successful AI or blockchain projects from conception to delivery.
